Hiking and Trekking event management application

## PROJECTS

**Movie Review System**

Store information of different movies and series and generate data whenever asked by the users and also save it as per the need of user. It allows to add movies and series of their own and give review and ratings too. It also displays ratings and comments on the movies or series on the bottom of that also views the most top rated movies and series which makes the user easy to make choice of movies and series.

**Automatic License Plate Detection using YOLO**

Recognize license plates with prior orientation knowledge for the letters and digits.

**LUDO using C programming**

**JumbledWordsGame**

Simple game developed using tkinter.

**Weather forecasting**

Provide users with up-to-date weather information for a given location. Simply created using Django and integrated with external APIs.

**Sanchar Project**

A pilot project done with support of the Nepal Red Cross Society and the International Federation of Red Cross and Red Crescent Socities. Simple website where you can fetch the news and find learning resources on Climate change related topics.
